

Exercise 12:

GuestGreeting.js:

```
1  function GuestGreeting() {  
2    return (  
3      <div>  
4        <h1>Please sign up.</h1>  
5      </div>  
6    );  
7  }  
8  
9  export default GuestGreeting;
```

UserGreeting.js:

```
1  function UserGreeting() {  
2    return (  
3      <div>  
4        <h1>Welcome back!</h1>  
5      </div>  
6    );  
7  }  
8  
9  export default UserGreeting;
```

LoginControl.js:

```
1  import React, { Component } from "react";
2  import GuestGreeting from "../GuestGreeting";
3  import UserGreeting from "../UserGreeting";
4
5  function LoginButton(props) {
6    return (
7      <button onClick={props.onClick}>
8        Login
9      </button>
10    );
11  }
12
13  function LogoutButton(props) {
14    return (
15      <button onClick={props.onClick}>
16        Logout
17      </button>
18    );
19  }
20
21  function Greeting(props) {
22    if (props.isLoggedIn) {
23      return <UserGreeting />;
24    }
25    return <GuestGreeting />;
26  }
27
28  class LoginControl extends Component {
29    constructor(props) {
30      super(props);
31      this.state = {isLoggedIn: false};
32    }
33
34    handleLoginClick = () => {
35      this.setState({isLoggedIn: true});
36    };
37
38    handleLogoutClick = () => {
39      this.setState({isLoggedIn: false});
40    };
41
42    render() {
43      let button;
44      if (this.state.isLoggedIn) {
45        button = (
46          <LogoutButton onClick={this.handleLogoutClick} />
47        );
48      } else {
49        button = (
50          <LoginButton onClick={this.handleLoginClick}/>
51        );
52      }
53
54      return (
55        <div>
56          <Greeting isLoggedIn={this.state.isLoggedIn}/>
57          {button}
58        </div>
59      );
60    }
61  }
62
63  export default LoginControl;
```

App.js:

```
1 import LoginControl from "../LoginControl";
2
3 function App() {
4   return (
5     <div>
6       <LoginControl />
7     </div>
8   );
9 }
10
11 export default App;
```

Output:

Please sign up.

Login

Welcome back!

Logout
