

Exercise 11:

App.js:

```
1  import EventExamples from "./EventExamples";
2  import CurrencyConvertor from "./CurrencyConvertor";
3
4  function App() {
5    return (
6      <div>
7        <EventExamples />
8        <br />
9        <CurrencyConvertor />
10     </div>
11   );
12 }
13
14 export default App;
```

CurrencyConvertor.js:

```
1  import React, { Component } from "react";
2
3  class CurrencyConvertor extends Component {
4    constructor() {
5      super();
6      this.state = {amount: "", currency: "Euro"};
7    }
8
9    handleAmount = (event) => {
10     this.setState({amount: event.target.value});
11   };
12
13   handleCurrency = (event) => {
14     this.setState({currency: event.target.value});
15   };
16
17   handleSubmit = (event) => {
18     event.preventDefault();
19     const result = this.state.amount * 80;
20     alert("Converting to Euro Amount is " + result);
21   };
22
23   render() {
24     return (
25       <div>
26         <h1 style={{ color: "green" }}>
27           Currency Converter!!!
28         </h1>
29
30         <form onSubmit={this.handleSubmit}>
31           <label>Amount:</label>
32           <input type="number" value={this.state.amount} onChange={this.handleAmount}/>
```

```

33
34
35
36     <label>Currency:</label>
37     <textarea
38       rows="1"
39       cols="20"
40       value={this.state.currency}
41       onChange={this.handleCurrency}
42     />
43
44     <br /><br />
45
46     <button type="submit">
47       Submit
48     </button>
49   </form>
50 </div>
51   );
52 }
53 }
54 export default CurrencyConverter;

```

EventExamples.js:

```

1  import React, { Component } from "react";
2  class EventExamples extends Component {
3    constructor() {
4      super();
5      this.state = {count: 1};
6    }
7
8    increment = () => {
9      this.setState({count: this.state.count + 1});
10     };
11
12    decrement = () => {
13      this.setState({count: this.state.count - 1});
14     };
15
16    sayHello = () => {
17      alert("Hello! Member");
18     };
19
20    incrementAndHello = () => {
21      this.increment();
22      this.sayHello();
23     };
24
25    sayWelcome = (message) => {
26      alert(message);
27     };
28
29    onPress = () => {
30      alert("I was clicked");
31     };
32

```

```

33   render() {
34     return (
35       <div>
36         <h3>{this.state.count}</h3>
37         <button onClick={this.incrementAndHello}>
38           Increment
39         </button>
40
41         <br /><br />
42
43         <button onClick={this.decrement}>
44           Decrement
45         </button>
46
47         <br /><br />
48
49         <button onClick={() => this.sayWelcome("Welcome")}>
50           Say Welcome
51         </button>
52
53         <br /><br />
54
55         <button onClick={this.onPress}>
56           Click on me
57         </button>
58       </div>
59     );
60   }
61 }
62 export default EventExamples;

```

Output:
